1 INTRODUCTION

TNSSv090410 codebook is a comprehensive document aimed primarly at accompanying and document the data collected in the first wave of The Nijmegen School Study.

The codebook has 2 sections. First the Study description contains information regarding the study itself, the time frame and protocol for collecting data and the structure of the questionnaire.

Second, the codebook contains detailed information description of the instruments used, the structure of the dataset, response rate and frequency tables of the variables and the script that was developed in order to collect data assisted by computers.

2 STUDY DESCRIPTION

2.1 THE STUDY

Title	The Nijmegen School Study wave 1
Alternative title	TNSS v090410
Abstract	The aim of The Nijmegen School Study (TNSS) is to collect detailed data on bullying behavior, friendships, explicit prejudice, implicit prejudice, negative and positive forms of interethnic contact, sexual harassment and gender explicit and implicit bias. The respondents of the first wave (TNSS v090410) are first and second year students in all levels of secondary education, within the same school. Following the bullying literature, different dimensions of bullying are distinguished (i.e. verbally, socially/relationally, physically and ethnic bullying). The data was collected assisted by computers, due to the nature of the state of the art instruments for measuring implicit biases. Several instruments were used: a main questionnaire and three Implicit Association tests for the student sample and a supplementary questionnaire for the mentors of the classes included in the study.
Keywords	Bullying, victimization, ethnicity, explicit prejudice, implicit prejudice, Implicit Association Test, Single Target Implicit Association Test, gender, sexual harassment, Gender Implicit Association Test
Autorship	Ioana Pop Jochem Tolsma* (corresponding author) Radboud University Nijmegen ICS / Sociology PO Box 9104 6500 HE Nijmegen, The Netherlands Phone: + 31 24 3613017 Fax: + 31 24 361 2399 E-mail: j.tolsma@maw.ru.nl

2.2 STUDY FRAME AND PROTOCOL

Unit of analysis	Individuals
Universe	All persons registered as students in the first and second year of secondary education of Mondial College, location Lindenholt, Nijmegen, The Netherlands, were invited to participate in the study (384 potential respondents in 8 first year classes and 7 second year classes). The mentors of the classes were also invited to fill in a supplementary questionnaire.
Location	Mondial College, location Lindenholt, Nijmegen, The Netherlands Website: www.mondialcollege.nl/Lindenholt Location Lindenholt, part of Mondial College, is a secondary level public school, who's mission is to prepare the students to a society with different cultures, philosophies and social values and norms, being committed to openness, acceptance and mutual respect. The levels of secondary education within location Lindenholt: athenaeum, Havo and Vmbo-T.
Response rate	**Student population** Total population 1st and 2nd years: 384

	Refusal to participate in the survey: 5 Missing from class at the time of data collection: 15 Respondents student population: 364 Response rate: 94.8% **Mentors population** Total population: 15 Refusal to fill in the nomination instrument: 0 Not present at the time of data collection: 1 Refusal to fill in the form allowing to match the supplementary questionnaire with the main questionnaire: 1 Respondents supplementary questionnaire: 14 Response rate: 93,3% Possibility to match data from supplementary and main questionnaire: 13 classes / 15
Time Frame and procedure	**December 2009** Letter addressed to location director **January 2010** Meeting with the location director regarding the proposal to participate in the research **January 2010** Proposal is presented to the location's education board and decision to participate is reached **15 March 2010** Letter of consent for participating in the research is sent to the parents of potential respondents Letter informing the mentors of the classrooms included in the survey **January – March 2010** Tests of the script for collecting data assisted by computers Preparation of 2 computer rooms at Lindenholt location **12 – 16 April 2010** Data collection
Protocol for data collection	A special network user was created, allowing access to the questionnaire script for only the research team and the IT personnel; Access to the script or to the row data collected is not allowed for third parties; For each participating class 30 different respondents numbers were assigned, 1 for every computer; The computers are prepared for data collection prior to respondents entering the assign rooms: the software for collecting data is launched and the unique respondent number is filled in for each computer by the research team members; Respondents can choose freely the computer they want to use for filling in the questionnaire. When conditions allow, respondents are asked to spread out; Respondents are supervised while filling in the questionnaire by the research team and the mentor or a supervising teacher; The instructions to the respondents and the main questionnaire are given in Dutch; The supplementary questionnaire addressed to the mentors is administered in Dutch; Saved data is collected from the school's server after each day and stored properly.
The datafile	TNSSv090410.sav - Contains data from the main questionnaire, students sample TNSSv090410_mentors.sav - Contains data from the supplementary questionnaire, mentors – sample
Data use and authorship	Datasets are available to the research community for no cost. The corresponding author is to be contacted in order to gain access to the data.

	Users are requested to provide references to all papers based on the TNSS data to the TNSS team. Whenever a paper is being written using TNSS data, an acknowledgement should be included, with the corresponding citation indicated in the present document. Data users should not make copies of the data available to others. Anyone wanting to use the data must contact the TNSS team directly to request a copy of the data free of charge.
Confidentiality	In order to guarantee anonymity, all information that allows identification of specific respondent was removed from the data files. Information regarding the class or marching the unique respondent number, name and the personal student number were requested in order to enable matching the data collected in the next waves of TNSS. This information is kept in separate data files that are not distributed to third parties. In accordance with data protection regulations, only anonymous data are available to users. Data allowing identifying respondents between waves is not to be distributed for public use. No information regarding any specific student is made available to school, parents or other third parties.

2.3 STRUCTURE OF QUESTIONNAIRE

2.3.1. MAIN QUESTIONNAIRE

The main questionnaire covers the following topics (with the corresponding items numbers in the variable list)

Topic	Item number in the variable list
General demographic background information	1; 2; 3; 4; 11; 12; 13; 14
Ethnicity and ethnic identification	5; 6; 7; 8; 9
Religiosity	15; 15a; 15a1; 15a2; 16
Status in class and self esteem	17; 18; 19; 20; 21
Parents involvement in school and cultural integration	22; 23; 24; 29; 30; 31; 32; 33
Perceived parent's involvement in bullying behaviour	25; 26; 27; 28
Explicit ethnic attitudes	34; 35; 36; 37; 38; 39; 40; 41; 56
Contact - ethnic	44; 45; 46; 47; 48; 49; 57; 58
Explicit gender attitudes	42; 43; 63; 64
Contact - gender	50; 51; 52; 53; 54, 55; 59; 60
Friendships in classroom	61; 62; 75; 76
Stereotypes - ethnicity	65; 66; 67; 68
Stereotypes - gender	69; 70; 71; 72
Stereotypes items - evaluation	73; 74
Victimization by bullying	78; 79; 80; 81; 82; 84; 85; 86
Victimization by sexual harassment	83
Bullying as perpetrator	87; 88; 89; 90; 91; 93; 94; 95
Perpetrator of sexual harassment	92

Administered: assisted by PC. The software use to program the main questionnaire: Inquisit 3.0

2.3.2. SUPPLEMENTARY QUESTIONNAIRE

Supplementary questionnaire used nomination techniques to collect data on the (perceived) friendships and bullying behaviour in classroom.

Procedure

The mentors received a form containing 2 nomination instruments. For the friendship nomination instrument a matrix was constructed, with the names of the pupils in classroom on first column and first row. The mentor task was to indicate when a pair of pupils are friends.

The bullying in classroom nomination instrument presented the names of the pupils on two columns. The mentor task was to indicate when a pupil listed on the first column is bullying a pupil listed on the second column from the beginning of the school year.

Administered: pen and paper

2.3.3 IMPLICIT ASSOCIATION TEST (IAT)

2.3.3.a Background information

The Implicit Association Test (IAT) provides a measure of strength of automatic associations. In the IAT a subject responds to a series of items that are to be classified usually into four categories – typically, two representing a concept discrimination such as flowers versus insects and two representing an attribute discrimination such as pleasant versus unpleasant valence. Subjects are asked to respond rapidly with a right-hand key press to items representing one concept and one attribute (e.g., insects and pleasant), and with a left-hand key press to items from the remaining two categories (e.g., flowers and unpleasant). Subjects then perform a second task in which the key assignments for one of the pairs is switched (such that flowers and pleasant share a response, likewise insects and unpleasant). The IAT produces measures derived from latencies of responses to these two tasks. These measures are interpreted in terms of association strengths by assuming

that subjects respond more rapidly when the concept and attribute mapped onto the same response are strongly associated (e.g., flowers and pleasant) than when they are weakly associated (e.g., insects and pleasant).

(source: Anthony G. Greenwald webpage at http://faculty.washington.edu/agg/iat_materials.htm)

The software for programming and administering IAT: Inquisit (http://www.millisecond.com/).

2.3.3.b Terminology

Stimuli – a word or image that represents the categories and evaluations in the test. For instance "heaven" is a stimuli for positive evaluations

Trials – determines format and timing when the stimuli are presented to the respondent.

Blocks – consist of a specific number of similar trials that are presented to the subject. Trials are presented to subjects in random order.

2.3.3.c Types of Implicit Association Tests administered

Three IAT were developed and administered as part of TNSS: two Single Target IAT and one classic IAT.

The Single Target IAT has the specificity that only measure the association between one concept and evaluations (positive and negative). The two separate STIAT were used to evaluate the implicit preference toward Moroccans and toward Dutch persons. The classic IAT was used to evaluate the implicit preference for Girls versus Boys.

The software use to program the IAT: Inquisit 3.0

Single Target IAT Moroccans

The STIAT measuring implicit preference for Moroccans was administered to respondents that were classified as Dutch. This classification implies that both of the respondent parents were born in The Netherland.

Stimuli used for category Moroccan and for positive and negative attributes are images (see Annexe).

The STIAT Moroccans procedure was the following:

Block	***Script label***	***Description***
Block 1	attributepractice	Respondents categorize positive and negative images 20 trials
Block 2	compatibletest1Moroccan	Respondents categorize positive, negative and Moroccan images 20 trials (practice) **Positive** + **Moroccans** – left key (E) **Negative** – right key (I)
Block 3	compatibletest2Moroccan	Respondents categorize positive, negative and Moroccan images 40 trials (test) **Positive** + **Moroccans** – left key (E) **Negative** – right key (I)
Block 4	incompatibletest1Moroccan	Respondents categorize positive, negative and Moroccan images 20 trials (practice) **Positive** – left key (E) **Negative** + **Moroccans** – right key (I)
Block 5	Incompatibletest2Moroccan	Respondents categorize positive, negative and Moroccan images 40 trials (test) **Positive** – left key (E) **Negative** + **Moroccans** – right key (I)

Single Target IAT Dutch

The STIAT measuring implicit preference for Dutch was administered to respondents that were classified as minority members. This classification implies that at least one of the respondent parents were born outside The Netherland.
Stimuli used for category Dutch and for positive and negative attributes are images (See Annexe).
The STIAT Dutch procedure was the following:

Block	***Script label***	***Description***
Block 1	attributepractice	Respondents categorize positive and negative images 20 trials
Block 2	compatibletest1Nederlander	Respondents categorize positive, negative and Dutch images 20 trials (practice) **Positive** + **Dutch** – left key (E) **Negative** – right key (I)
Block 3	compatibletest2Nederlander	Respondents categorize positive, negative and Dutch images 40 trials (test) **Positive** + **Dutch** – left key (E) **Negative** – right key (I)
Block 4	incompatibletest1Nederlander	Respondents categorize positive, negative and Dutch images 20 trials (practice) **Positive** – left key (E) **Negative** + **Dutch** – right key (I)
Block 5	Incompatibletest2Nederlander	Respondents categorize positive, negative and Dutch images 40 trials (test) **Positive** – left key (E) **Negative** + **Dutch** – right key (I)

Classic Gender IAT

The classic IAT was used to measure implicit preference for girls versus boys.
All respondents received the same test.
Stimuli used for the Gender IAT are words (for the positive and negative stimuli) and names for boys and girls categories (see Annexe).
The Gender IAT procedure was the following

Block	***Script label***	***Description***
Block 1	practiceatribute	Respondents categorize words stimuli for the positive and negative evaluations 20 trials (practice) **Positive** – left (E key) **Negative** – right (I key)
Block 2	practicenames	Respondents categorize names stimuli for the boy and girl category 20 trials (practice) **Girls** – left (E key) **Boys** – right (I key)
Block 3	compatible_practice	Respondents categorize words stimuli for the positive and negative evaluations and names for boys and girls categories 20 trials (practice) **Girls** + **Positive** – left (E key) **Boys** + **Negative** – right (I key)
Block 4	compatible_target	Respondents categorize words stimuli for the positive and negative evaluations and names for boys and girls categories 40 trials (practice) **Girls** + **Positive** – left (E key) **Boys** + **Negative** – right (I key)
Block 5	incompatible_practice	Respondents categorize words stimuli for the positive and negative evaluations and names for boys and girls categories 20 trials (practice) **Boys** + **Positive** – left (E key)

		Girls + **Negative** – right (I key)
Block 6	incompatible_target	Respondents categorize words stimuli for the positive and negative evaluations and names for boys and girls categories 40 trials (practice) **Boys** + **Positive** – left (E key) **Girls** + **Negative** – right (I key)

Procedure to compute IAT score: see Greenwald, A. G, Nosek, B. A., & Banaji, M. R. (2003). Understanding and using the Implicit Association Test: I. An improved scoring algorithm. *Journal of Personality and Social Psychology*, *85*, 197-216.

The public dataset includes only the IAT scores computed using the procedure detailed in the above mentioned article, and not the raw data that was used to derive them. The raw IAT data is available upon request.

Interpretation of scores:
Gender IAR:

3. a positive score indicate an automatic preference toward girls compared to boys
4. s negative score indicate an automatic preference toward boys compared to girls
5. higher values indicate stronger preferences

ST IAT Moroccans

- a positive score indicate an automatic association of Moroccans with positive attribute
- a negative score indicate an automatic association of Moroccans with negative attribute
- higher values indicate stronger preferences

ST IAT Dutch

- a positive score indicate an automatic association of Dutch with positive attribute
- a negative score indicate an automatic association of Dutch with negative attribute
- higher values indicate stronger preferences

ANNEXES

3.1 MAIN QUESTIONNAIRE (DUTCH)

Beste deelnemer,

DEZE VRAGENLIJST IS ANONIEM!
Niemand, dus ook niet de leraar/lerares of een klasgenoot, mag meekijken terwijl je deze lijst invult. Vul de vragenlijst alsjeblieft eerlijk en volledig in. Een antwoord kan nooit fout zijn, het gaat ons om jouw gedrag en mening!
Als je een vraag niet begrijpt of je wilt iets weten: steek je vinger op, iemand komt je dan helpen. We vragen je dringend om niet te praten. Het duurt ongeveer 30 minuten om de vragenlijst in te vullen. Klik op de knop "ENTER" om naar de vragen te gaan.

1 Ik ben een:
jongen

3 Mijn leerlingnummer is: _____

4 Ben je ooit blijven zitten?
Ja
Nee

In Nederland wonen verschillende groepen mensen. Die mensen of hun familie komen uit verschillende landen.
Zo zijn er Turkse mensen, Marokkaanse mensen, Surinaamse mensen, maar ook Nederlandse mensen en nog veel meer.
Schrijf nu eerst hieronder wat jij bent!

5 Ik ben een: _____

6 Vind je het fijn dat je _____ bent?
Nee, zeker niet!
Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

7 Ben je er trots op dat je _____ bent?"
Nee, zeker niet!
Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

8 Ik ben geboren in:
Nederland
Turkije
Marokko
Suriname
Nederlandse Antillen / Aruba
Anders, namelijk _____

9 Mijn MOEDER is geboren in
Nederland
Turkije
Marokko
Suriname
Nederlandse Antillen / Aruba
Anders, namelijk _____

10 Mijn VADER is geboren in:
Nederland
Turkije
Marokko
Suriname
Nederlandse Antillen / Aruba
Anders, namelijk _____

11 Het hoogste onderwijsdiploma van mijn MOEDER is:
geen diploma
lager onderwijs\basisonderwijs (lo)

lager beroepsonderwijs (lbo)
middelbaar algemeen voortgezet onderwijs (mavo)
middelbaar algemeen beroepsonderwijs (mbo)
hoger algemeen en voorbereidend wetenschappelijk onderwijs (havo/vwo/gymnasium)
hoger beroepsonderwijs (hbo)
universiteit (wo)

15 De volgende vragen gaan over geloof. Vind je van jezelf dat je bij een bepaald geloof hoort?
Ja
Nee

15a Zo ja, welk geloof?
Christelijk
Islam
overige godsdienst

15a1 Welke vorm?
Shi'ieten
Sunnieten
Alevieten
Ahmadiyya
Salafisten
Algemeen
Anders

15a2 Welke vorm?
Nederlands Hervormd
Gereformeerd
Protestantse Kerk Nederland
Evangelische Broedergemeenschap
Pinkstergemeente
Jehova´s getuige
Anders

16 Ik ga .... naar de kerk of moskee:
elke dag
elke week
elke maand
een paar keer per jaar
nooit/minder dan 1 keer per jaar

17 Ben je weleens eenzaam in de klas?
Nee, zeker niet!
Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

18 Sommige kinderen zijn vaak ongelukkig of verdrietig. Jij ook?
Nee, zeker niet!
Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

19 Sommige kinderen zijn tevreden met zichzelf. Jij ook?
Nee, zeker niet!
Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

20 Sommige kinderen vinden het prima zoals ze zijn. Jij ook?
Nee, zeker niet!

Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

21 Sommige kinderen voelen zich vaak gelukkig met zichzelf. Jij ook?
Nee, zeker niet!
Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

22 Hoe vaak gingen je ouders naar ouderavonden toen je net op deze school zat?

In Nederland wonen verschillende groepen mensen.
Natuurlijk wonen er Nederlanders. Er zijn ook etnische minderheden in Nederland. Zoals bijvoorbeeld Turkse Nederlanders (Turken), Marokkaanse Nederlanders (Marokkanen), Surinaamse Nederlanders (Surinamers) en nog veel meer. Deze groepen worden etnische minderheden genoemd.
Beantwoord alsjeblieft de volgende vragen over etnische minderheden in Nederland.

34 Gebruik alsjeblieft de volgende thermometer om te laten zien wat je vindt van etnische minderheden in Nederland
Koud (negatief) Warm (positief)

0 100

35 Gebruik alsjeblieft de volgende thermometer om te laten zien wat je vindt van Nederlanders
Koud (negatief) Warm (positief)

0 100

36 Om leden van etnische minderheden als BUREN te hebben lijkt me:
Heel vervelend
Vervelend
Niet vervelend maar ook niet leuk
Leuk
Heel leuk

37 Om een RELATIE te hebben, of getrouwd te zijn, met een lid van een etnische minderheid lijkt me:
Heel vervelend
Vervelend
Niet vervelend maar ook niet leuk
Leuk
Heel leuk

38 Om Nederlanders als BUREN te hebben lijkt me:
Heel vervelend
Vervelend
Niet vervelend maar ook niet leuk
Leuk
Heel leuk

39 Om een RELATIE te hebben, of getrouwd te zijn, met een Nederlander lijkt me:
Heel vervelend
Vervelend
Niet vervelend maar ook niet leuk
Leuk
Heel leuk

40 Voel je je gemakkelijk in de aanwezigheid van etnische minderheden?
Ja, heel erg
Ja, een beetje
Nee, niet echt
Nee, helemaal niet

41 Voel je je gemakkelijk in de aanwezigheid van Nederlanders?
Ja, heel erg
Ja, een beetje
Nee, niet echt
Nee, helemaal niet

42 Voel je je gemakkelijk in de aanwezigheid van vrouwen (meisjes)?
Ja, heel erg
Ja, een beetje
Nee, niet echt
Nee, helemaal niet

43 Voel je je gemakkelijk in de aanwezigheid van mannen (jongens)?
Ja, heel erg
Ja, een beetje
Nee, niet echt
Nee, helemaal niet

44 Ben je ooit bedreigd door etnische minderheden (buiten je schoolklas)?
Ja
Nee

45 Ben je ooit uitgescholden door etnische minderheden (buiten je schoolklas)?

Ja
Nee

46 Ben je ooit geslagen of geschopt door etnische minderheden (buiten je schoolklas)?
Ja
Nee

47 Ben je ooit bedreigd door Nederlanders (buiten je schoolklas)?
Ja
Nee

48 Ben je ooit uitgescholden door Nederlanders (buiten je schoolklas)?
Ja
Nee

49 Ben je ooit geslagen of geschopt door Nederlanders (buiten je schoolklas)?
Ja
Nee

50 Ben je ooit bedreigd door mannen (jongens) (buiten je schoolklas)?
Ja
Nee

51 Ben je ooit uitgescholden door mannen (jongens) (buiten je schoolklas)?
Ja
Nee

52 Ben je ooit geslagen of geschopt door mannen (jongens) (buiten je schoolklas)?
Ja
Nee

53 Ben je ooit bedreigd door vrouwen (meisjes) (buiten je schoolklas)?
Ja
Nee

54 Ben je ooit uitgescholden door vrouwen (meisjes) (buiten je schoolklas)?
Ja
Nee

55 Ben je ooit geslagen of geschopt door vrouwen (meisjes) (buiten je schoolklas)?
Ja
Nee

56 Mensen die uit een ander land naar Nederland zijn gekomen mogen hun eigen cultuur bewaren.
Nee, zeker niet!
Nee, niet zo
Tussenin
Ja, best wel
Ja, zeker!

57 Heb je over het algemeen meer positief of negatief contact gehad met etnische minderheden?
meer negatief meer positief
-5 5

58 Heb je over het algemeen meer positief of negatief contact gehad met Nederlanders?
meer negatief meer positief
-5 5

59 Heb je over het algemeen meer positief of negatief contact gehad met mannen (jongens)?
meer negatief meer positief
-5 5

60 Heb je over het algemeen meer positief of negatief contact gehad met vrouwen (meisjes)?
meer negatief meer positief
-5 5

61 Hoeveel goede vrienden in je klas zijn een etnische minderheid?
zoals bijvoorbeeld Turkse Nederlanders, Marokkaanse Nederlanders of andere groepen _____

62 Hoeveel goede vrienden in je klas zijn Nederlanders? _____

63 Gebruik alsjeblieft de volgende thermometer om te laten zien wat je vindt van MANNEN (JONGENS)
Koud (negatief) Warm (positief)

0 100

64 Gebruik alsjeblieft de volgende thermometer om te laten zien wat je vindt van VROUWEN (MEISJES)
Koud (negatief) Warm (positief)

0 100

65 Hoeveel procent van alle etnische minderheden zijn arrogant?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

66 Hoeveel procent van alle etnische minderheden zijn agressief?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

67 Hoeveel procent van alle Nederlanders zijn arrogant?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

68 Hoeveel procent van alle Nederlanders zijn agressief?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

69 Hoeveel procent van alle vrouwen (meisjes) zijn arrogant?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

70 Hoeveel procent van alle vrouwen (meisjes) zijn agressief?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

71 Hoeveel procent van alle mannen (jongens) zijn arrogant?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

72 Hoeveel procent van alle mannen (jongens) zijn agressief?
0% 10% 20% 30% 40% 50% 60% 70% 80% 90% 100%

73 Wat vind je van agressief gedrag?
heel erg goed neutraal heel erg slecht
-5 5

74 Wat vind je van arrogant gedrag?
heel erg goed neutraal heel erg slecht
-5 5

75 Hoeveel goede vrienden in je klas zijn jongens? ____

76 Hoeveel goede vrienden in je klas zijn meisjes? ____

Nu komen er vragen over of pesten. We zeggen dat een leerling wordt gepest als een andere leerling

- *Gemene dingen tegen hem of haar zegt*
- *Hem of haar buitensluit*
- *Slaat, schopt, of duwt*
- *Leugens over hem of haar vertelt*

Als we het hebben over pesten dan gebeuren deze dingen regelmatig. Een leerling die wordt gepest vindt het moeilijk om zichzelf te verdedigen. Als twee leerlingen ruziemaken die ongeveer even sterk zijn is het geen pesten.

77 Heb je deze uitleg begrepen?
JA
NEE

78 Hoe vaak ben je gepest op school in dit schooljaar?
Ik ben niet gepest op school in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

79 Ik werd uitgescholden, werd belachelijk gemaakt of op een gemene manier geplaagd.
Dit is niet met mij gebeurd dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

80 Andere leerlingen lieten me expres buiten dingen, sloten me uit van hun groep vrienden, of negeerden me helemaal."
Dit is niet met mij gebeurd dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

81 Ik werd geslagen, geschopt, geduwd of opgesloten."
Dit is niet met mij gebeurd dit schooljaar

Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

82 Een of meer andere leerlingen vertelden leugens over me of verspreiden roddels over me en probeerden ervoor te zorgen dat anderen mij niet meer aardig vonden."
Dit is niet met mij gebeurd dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

83 Was je dit jaar het doelwit van seksueel getinte opmerkingen, grappen, geplaag, gebaren of blikken? "
Dit is niet met mij gebeurd dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

84 Werd je dit schooljaar belachelijk gemaakt of uitgescholden vanwege je etniciteit?
Dit is niet met mij gebeurd dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

85 Werd je dit schooljaar gepest door jongens of door meisjes?
Dit is niet met mij gebeurd dit schooljaar
Vooral door 1 meisje
Door verschillende meisjes
Vooral door 1 jongen
Door verschillende jongens
Door zowel jongens als meisjes

86 Werd je dit schooljaar gepest door iemand uit je eigen etnische groep of door iemand van een andere etnische groep?
Dit is niet met mij gebeurd dit schooljaar
Vooral door 1 iemand van een andere etnische groep
Door verschillende mensen van een andere etnische groep
Vooral door 1 iemand uit mijn eigen etnische groep
Door verschillende mensen uit mijn eigen etnische groep
Door zowel mensen uit mijn eigen etnische groep als door mensen uit een andere etnische groep

87 Hoe vaak heb jij andere leerlingen gepest op school in dit schooljaar?
Ik heb geen andere leerlingen gepest op school in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

88 Ik heb andere leerlingen uitgescholden, belachelijk gemaakt of op een gemene manier geplaagd.
Dit is niet gebeurd in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

89 Ik heb andere leerlingen expres buiten dingen gelaten, buitengesloten van mijn groep vrienden, of helemaal genegeerd.
Dit is niet gebeurd in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

90 Ik heb andere leerlingen geslagen, geschopt, geduwd of opgesloten."
Dit is niet gebeurd in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

91 Ik heb leugens of roddels verteld over andere leerlingen of ervoor geprobeerd te zorgen dat ze niet meer aardig werden gevonden door andere leerlingen.
Dit is niet gebeurd in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

92 Heb je dit schooljaar tegen iemand seksueel getinte opmerkingen, grappen of gebaren gemaakt, of blikken toegeworpen?
Dit is niet gebeurd in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

93 Heb je dit schooljaar iemand belachelijk gemaakt of uitgescholden vanwege zijn of haar etniciteit?
Dit is niet gebeurd in dit schooljaar
Het is maar 1 of 2 keer gebeurd
Ongeveer 1 keer per maand
2 of 3 keer per maand
Ongeveer 1 keer per week
Meerdere keren per week

94 Heb je jongens of meisjes gepest?
Ik heb in dit schooljaar geen andere leerlingen gepest op school
Vooral 1 meisje
Verschillende meisjes
Vooral 1 jongen
Verschillende jongens
Zowel jongens als meisjes

95 Heb je mensen uit je eigen etnische groep of mensen van een andere etnische groep gepest?
Ik heb in dit schooljaar geen andere leerlingen gepest op school
Vooral 1 iemand van een andere etnische groep
Verschillende mensen van een andere etnische groep
Vooral 1 iemand uit mijn eigen etnische groep
Verschillende mensen uit mijn eigen etnische groep
Zowel mensen uit mijn eigen etnische groep als mensen uit een andere etnische groep

ANNEXES

3.2 SUPPLEMENTARY QUESTIONNAIRE

Beste mentor van klas ....,

Zoals u weet, vullen de leerlingen uit uw klas op dit moment een enquete in over pesten in de klas. Zij beantwoorden onder andere vragen over of zij wel eens klasgenoten hebben gepest in het afgelopen schooljaar en of ze zelf slachtoffer zijn geworden van pesten. Behalve aan de kinderen, willen we graag ook aan u vragen stellen over wie er pesten en gepest worden in de klas. Op deze manier weten we zeker om welke kinderen het gaat.

1. Geef aan met behulp van een "X" welke vriendenparen er zijn in de klassen.

Aan de ouders van leerlingen uit klas 1 of 2
van het Mondial College

15-03-2010

Geachte heer / mevrouw,

In april 2010 start de afdeling sociologie van de Radboud Universiteit Nijmegen een onderzoek naar pestgedrag op middelbare scholen in Nijmegen. Dit onderzoek heeft als doel pestgedrag in kaart te brengen en te verklaren. Hiervoor zouden wij graag op de school van uw kind gegevens verzamelen.

In het onderzoek wordt leerlingen gevraagd op de computer een vragenlijst in te vullen. Het invullen van deze vragenlijst duurt maximaal één lesuur. In dit lesuur zal leerlingen uitleg worden gegeven over het onderzoek. Het invullen van de vragenlijst vindt plaats onder begeleiding van een lid van het onderzoeksteam. Tijdens de afname zal de leraar ervoor zorgen dat de vragenlijsten in alle rust, anoniem en vertrouwelijk worden ingevuld.

Conform de Wet Bescherming Persoonsgegevens worden alle gegevens anoniem behandeld en heeft niemand buiten het onderzoeksteam van de Radboud Universiteit Nijmegen toegang tot deze gegevens. Dit houdt ook in dat geen antwoorden of gegevens van uw kind aan de school gerapporteerd zullen worden.

Indien u **niet** instemt met de afname van de vragenlijst bij uw kind, dan kunt u dit laten weten door de onderstaande antwoordstrook in te vullen. U of uw kind kan deze antwoordstrook bij de mentor van de klas van uw kind inleveren. U kunt ook rechtstreeks naar ons mailen. Indien de school geen reactie ontvangt, gaan wij ervan uit dat u instemt met deelname van uw kind. Mocht u vragen of opmerkingen hebben dan kunt u contact opnemen met Jochem Tolsma (J.Tolsma@maw.ru.nl).

Als u deze brief niet goed begrijpt, dan kunt u contact opnemen met Jochem Tolsma via e-mail (J.Tolsma@maw.ru.nl) of telefoon (024-3613017).

Met vriendelijke groet,

Dr. Jochem Tolsma

3.4 LETTER ADDRESSED TO MENTORS

Radboud Universiteit Nijmegen

MONDIAL COLLEGE

Beste mentoren van het Mondial College,

De komende maanden zal er op het Mondial College een onderzoek plaatsvinden naar pestgedrag door een onderzoeksteam van de Radboud Universiteit Nijmegen. Wij willen u daar graag over informeren door middel van deze e-mail.

We willen de leerlingen uit het eerste en tweede leerjaar en hun ouders vragen aan het onderzoek deel te nemen. Zij zullen een vragenlijst voorgelegd krijgen die op de computer ingevuld moet worden. Dit duurt ongeveer 35 minuten. Het onderzoek zal plaatsvinden tijdens een mentoruur in een van de computerruimtes. Bij de afname van deze vragenlijst zijn één of meer leden van het onderzoeksteam aanwezig om het onderzoek bij de leerlingen te introduceren en om uitleg te geven over de manier waarop de vragenlijst ingevuld moet worden.

Het onderzoek zal gaan over pesten en dan meer specifiek over inter-etnisch en inter-gender pestgedrag. Wij willen graag weten hoe vaak en waarom dit voorkomt en welke gevolgen dit heeft voor de leerlingen. Andere onderwerpen waarover de vragen gaan zijn bijvoorbeeld de betrokkenheid van de ouders bij de school.

Na afronding van het onderzoek zullen wij onze belangrijkste onderzoeksbevindingen en adviespunten in een rapportage samenvatten. Ook andere wetenschappelijke publicaties die uit ons onderzoek voortvloeien worden u ter beschikking gesteld.

Binnenkort zullen de ouders een brief ontvangen waarin toestemming wordt gevraagd om hun kind te laten deelnemen aan dit onderzoek. Als zij hiermee niet instemmen, zullen zij om dit kenbaar te maken ons e-mailen of een briefje meegeven, dat aan de mentor overhandigd kan worden. Als u dergelijke briefjes ontvangt, dan verzoeken wij u vriendelijk om ons dit te laten weten via het e-mailadres j.tolsma@maw.ru.nl.

Wij vragen u vriendelijk om uw medewerking aan dit onderzoek. Als u nog vragen heeft naar aanleiding van deze brief, aarzel dan niet om contact met ons op te nemen.

Met vriendelijke groet van het onderzoeksteam,

Ingrid van Dijk, Ioana Pop en Jochem Tolsma

Explanatory note on the translation of the nomination instruments from the supplementary questionnaire in the corresponding database TNSS090410_mentors.sav.

In order to illustrate the translation of the nomination instruments from the supplementary questionnaire in the database, we will use the following hypothetical example for friendship nominations. Suppose we have a classroom consisting of 4 pupils that are presented as illustrated in the supplementary questionnaire model, in the following matrix:

1 EXAMPLE OF NOMINATION INSTRUMENTS

	order	1	2	3	4
order	name	Ingrid	Sander	Erik	Anna
1	Ingrid				
2	Sander				
3	Erik				
4	Anna				

To each pupil listed in the left column an order number is assign. The order of the names is preserved when listing the names on the upper row, meaning that the same order number applies. In order to translate this nomination matrix to the dataset the following transformation occurs, considering that the mentor indicates the following friendship ties:

2 EXAMPLE OF FRIENDSHIP NOMINATIONS PROVIDED BY MENTOR

	order	1	2	3	4
order	name	Ingrid	Sander	Erik	Anna
1	Ingrid	0	1	1	0
2	Sander	1	0	1	0
3	Erik	1	1	0	0
4	Anna	0	0	0	0

⇩

3 EXAMPLE OF TRANSLATION OF THE FRIENDSHIP NOMINATIONS INTO THE DATASET

order	IDresp	F_1	F_2	F_3	F_4
1	23	***0***	**1**	1	0
2	24	**1**	***0***	1	0
3	25	1	1	***0***	0
4	26	0	0	0	***0***

The following changes occur:

- Names on column are replaced by the unique respondent number;

- Each row represent 1 student
- Names on upper row are replaced by variables. Each variable store the nomination that is made toward a particular student. For instance, respondent 23 (order number: 1) is nominated as being friend with respondent 24 (order number: 2) and this is indicated with placing an 1 on variable F_2 on the row that corresponds to the respondent 23.

The same procedure is applied for the bullying nomination, the difference between the nomination instruments being the format of administering the instrument.

Specificity of friendship and bullying nominations in TNSS database:

- Friendship nominations should be symmetrical, because it involves identifying pairs of friends. This means that if student order number 1 is nominated as friend with students order number 2, the same applies for students order number 2 in relation to student order number 1 (see table above, bold figures). Data should be checked to see if this principle is respected for all friendship nominations within a class.
- Nominations are **not** symmetrical for the bullying nomination instrument, because it records when a student listed on a row is bullying a victim listed on a column. Thus, the rows represent the perpetrators identified in a classroom while the variable B_1, B_2, etc. represent the potential victims.
- Auto nominations are not possible. This means that on the diagonal of the matrix there should only be zeros. (See table above, bold-italics figures).
- Correct interpretation of the levels of friendships or bullying can only be done with reference to a specific classroom.
- Due to maximum sixe of a classroom as being 30, the number of variables that store the friendship nominations is 30. Same applies for the variables that store the bullying nominations. When a classroom size is smaller than 30, this is indicated with filling code 88 for the remaining non-used variables. For instance, if class size is 25, variables used to store nominations will range from f_1 to f_25 and b_1 to b_25, while remaining variables will be filled with code 88.

<page intro_general>
Beste deelnemer,^^
DEZE VRAGENLIJST IS ANONIEM! ^^
^^Niemand, dus ook niet de leraar/lerares of een klasgenoot, mag meekijken terwijl je deze lijst invult.
^^
Vul de vragenlijst alsjeblieft eerlijk en volledig in. Een antwoord kan nooit fout zijn, het gaat ons om jouw gedrag en mening!
^^
Als je een vraag niet begrijpt of je wilt iets weten: steek je vinger op, iemand komt je dan helpen. We vragen je dringend om niet te praten.
^^
Het duurt ongeveer 30 minuten om de vragenlijst in te vullen.
^^
Klik op de knop “ENTER” om naar de vragen te gaan.
</page>

<page end>
Bedankt voor het invullen van de vragenlijst!
</page>

/ caption = "Nu komen er vragen over of pesten. We zeggen dat een leerling wordt gepest als een andere leerling
- Gemene dingen tegen hem of haar zegt
- Hem of haar buitensluit
- Slaat, schopt, of duwt
- Leugens over hem of haar vertelt

Als we het hebben over pesten dan gebeuren deze dingen regelmatig.

Een leerling die wordt gepest vindt het moeilijk om zichzelf te verdedigen.

Als twee leerlingen ruziemaken die ongeveer even sterk zijn is het geen pesten.

/ 1 = "Plaats je middelvingers of wijsvingers op de E en I toetsen van je toetsenbord. Op het scherm verschijnen in het midden woorden die bij een van de categorieen bovenin horen. Als het woord bij de linker categorie hoort, druk dan op de E-toets. Als het woord bij de rechter categorie hoort, druk dan op de I-toets. De woorden horen maar bij één categorie. Als je een fout maakt, verschijnt er een X. Druk dan op de andere toets, zodat het woord bij de categorie terechtkomt waar het hoort.

Het is belangrijk dat je probeert om de woorden ZO SNEL MOGELIJK bij een categorie in te delen. Maar je moet ook proberen om zo weinig mogelijk fouten te maken!"
